

Ski Performance Report

One-page coaching summary generated from Blue IQ analysis

209 / 240
EXCELLENT

Overall Performance

The athlete demonstrated strong edge control and balance throughout the performance, achieving a commendable overall score of 209.0. However, there are specific areas that require focused improvement to enhance overall skiing technique.

Pressure

203 / 240

EXCELLENT

The pressure management was consistent, with scores ranging from 201.5 to 206.9. This indicates a solid understanding of weight distribution during turns. Focus on maintaining consistent pressure throughout the turn to enhance ski

Balance

209 / 240

EXCELLENT

Balance scores varied significantly, peaking at 217.9 in the second window but dropping to 153.9 in the first. This inconsistency suggests fluctuations in stability. Work on maintaining a centered athletic stance to improve overall

Rotation

209 / 240

EXCELLENT

Rotation scores improved over time, with a final score of 208.9 indicating good progress in upper-body alignment and turn initiation. Continue to refine upper-body alignment to ensure effective rotation and minimize unnecessary movements.

Edging

216 / 240

EXCELLENT

Edging was a significant strength, with a high score of 215.7. The athlete displayed excellent edge control, particularly in the first and second windows. Maintain this strong edge control while integrating it with improved pressure management and

Improvement Areas

- 1 Enhance knee flexion to support a more dynamic athletic stance.
- 2 Focus on turn-to-turn transition control to ensure smoother and more fluid movements.
- 3 Address upper-body alignment to promote better rotation and overall technique.
