

Ski Performance Report

One-page coaching summary generated from Blue IQ analysis

Overall Performance

{'final_score': 132.1, 'performance_level': 'Developing', 'summary': 'The athlete demonstrates a developing skill level in skiing, showing potential for improvement in key areas. Consistency in performance across multiple windows indicates a solid foundation, but targeted focus on specific skills will enhance overall effectiveness.'}

Pressure

123 / 240

EMERGING

Pressure management shows a developing trend, with scores improving slightly over the time windows. Maintaining appropriate pressure on the skis is crucial for stability and control. Work on maintaining consistent pressure throughout

Balance

123 / 240

EMERGING

Balance is relatively strong, with scores remaining stable. However, slight fluctuations suggest room for improvement in maintaining stability during transitions. Enhance balance by practicing drills that promote an athletic stance and knee

Rotation

91 / 240

EMERGING

Rotation scores indicate a need for improvement, particularly in the initial phase of turns. The athlete struggles with maintaining upper-body alignment. Concentrate on upper-body alignment during turns to minimize unnecessary

Edging

190 / 240

PROFICIENT

Edging scores are strong, demonstrating effective edge control. This is a key strength that can be leveraged to improve overall performance. Continue to refine edge control, especially during transitions. Explore exercises that emphasize smooth

Improvement Areas

- 1 Prioritize rotation so it moves closer to the other three pillars.
- 2 Keep the skis more parallel through transitions and avoid rushing the turn entry.
- 3 Maintain a stable athletic stance so pressure, balance, and edge control stay connected.
