

Ski Performance Report

One-page coaching summary generated from Blue IQ analysis

Overall Performance

The athlete demonstrates solid edge control and balance, but there are notable areas for improvement in rotation and pressure management.

Pressure

124 / 240

EMERGING

Pressure management shows potential but needs refinement. Build a smoother pressure release so the skier is not forced back at the end of the turn.

Balance

124 / 240

EMERGING

Balance is generally good, especially in the final part of the run. Focus on staying centered over the feet before adding more speed or turn shape.

Rotation

92 / 240

EMERGING

Rotation scores indicate a need for better upper-body alignment. Keep the upper body calmer so the skis can finish the turn without extra twisting.

Edging

191 / 240

PROFICIENT

Edging is strong, particularly in the final part of the run. Refine edge control so the skier can hold a cleaner arc through the fall line.

Improvement Areas

- 1 Keep the upper body calmer so the skis can finish the turn without extra twisting.
- 2 Build a smoother pressure release so the skier is not forced back at the end of the turn.
- 3 Focus on staying centered over the feet before adding more speed or turn shape.
