

Ski Performance Report

One-page coaching summary generated from Blue IQ analysis

132 / 240
DEVELOPING

Overall Performance

The athlete demonstrates developing skills with a final score of 132.1, indicating a solid foundation in skiing techniques. However, there are key areas that require focused improvement to enhance overall performance.

Pressure

123 / 240

EMERGING

Pressure control shows moderate performance, with scores improving slightly over the time windows. The athlete needs to work on maintaining consistent pressure throughout turns. Focus on applying pressure evenly across the skis during turns

Balance

123 / 240

EMERGING

Balance is relatively strong, with scores remaining consistent. However, there is room for improvement in dynamic situations. Enhance balance by practicing drills that require quick adjustments to maintain stability while skiing.

Rotation

91 / 240

EMERGING

Rotation scores indicate a need for improvement, especially in the initial phase of turns. The athlete struggles with upper-body alignment during transitions. Work on upper-body alignment to ensure it follows the lower body

Edging

190 / 240

PROFICIENT

Edging is a notable strength, with high scores indicating effective edge control. This skill can be further refined. Continue to develop edge control through varied terrain and conditions to enhance versatility and responsiveness.

Improvement Areas

- 1 Enhance ski parallel control to maintain consistent edge engagement.
- 2 Focus on knee flexion to improve athletic stance and stability.
- 3 Develop transition control to ensure smoother turn initiation and completion.
- 4 Practice drills that promote upper-body alignment during turns.
